

2009 Idaho Insect & Disease Identification and

Management Training Series

Insects & diseases are important agents of change in Idaho's forests. Forest managers and forest landowners should have a comprehensive knowledge of insects & diseases to facilitate proactive management of forests to minimize unacceptable tree losses. The Idaho Department of Lands and the US Forest Service are proud to offer training sessions designed to increase your knowledge base of insect & disease identification and management techniques. This year we offer one basic identification training session in Coeur d'Alene ID, at the IPNF Supervisor's Office on May 27-28, and one insect and disease management session in Coeur d'Alene at the IPNF Supervisor's Office on June 2-4. Seating is limited so please enroll early by sending the attached registration form ***and indicate the session you are registering for.***

See map and directions below

REGISTRATION
